Professional Experience

Senior Full-Stack Developer Convex Technologies	Jan 2025 - Present Addis Ababa, Ethiopia
• Developed and maintained a large-scale sports betting platform using React, Next.js, and Node.js • Built scalable APIs and optimized backend performance for high-traffic betting events • Implemented responsive UI components, improving user engagement and performance • Collaborated with cross-functional teams to deliver casino games for African markets	
Full-Stack Developer Condigital	Aug 2023 - Dec 2025 Addis Ababa, Ethiopia
• Contributed to the development of an ERP system using React and Node.js • Integrated third-party APIs (Strapi CMS) and improved system performance • Implemented pixel-perfect UI components from Figma designs • Improved application maintainability through clean architecture and TypeScript usage	
Senior Full-Stack Developer Ashewa Technology Solution S.C	Dec 2023 - Dec 2024 Addis Ababa, Ethiopia
• Developed UI features for Ashewa's e-commerce ecosystem, including customer, seller, and internal platforms. • Integrated frontend components with backend APIs and optimized performance. • Contributed to backend services for the Ashewa delivery platform. • Implemented features such as SSO and advanced search for a platform serving 50,000+ users.	
Senior Frontend Developer Kifiya Financial Technology PLC	Jul 2023 - Jan 2024 Addis Ababa, Ethiopia
• Implemented pixel-perfect websites for in-house management and customer systems. • Wrote clean, maintainable, and well-structured code. • Gained experience in implementation and documentation.	
Backend Engineer Kemer Habesha	Oct 2022 - Sep 2023 Addis Ababa, Ethiopia
• Developed and maintained RESTful APIs supporting frontend applications. • Built backend services using Node.js and modern frameworks. • Optimized database queries and improved backend performance. • Learned new frameworks continuously.	
Full-Stack Developer CrossRoads Agricultural Solutions PLC	Feb 2022 - Jan 2023 Addis Ababa, Ethiopia
• Participated in the end-to-end development process. • Created API endpoints for front-end developers.	

- Assisted front-end developers with API connections.

Full-Stack Developer
Relief Business Network

Jul 2021 - Mar 2023
Addis Ababa, Ethiopia

- Developed a job portal and bidding platform using the MEVN stack.
- Built frontend components with Vue.js and integrated backend APIs.
- Designed database schemas and implemented core application features.

Projects

Mula Sport January 2025 - Present

<https://www.mulasport.com/>

Working on **Mula Sport**, an interactive sports betting platform designed for the African market. Contributed to developing responsive user interfaces and integrating real-time betting features to provide a dynamic gaming experience. Focused on performance, usability, and reliability in a high-traffic betting environment.

Peoplearn September 2025 - November 2025

<https://peoplelearn.io/>

Built **Peoplearn**, a community-driven education platform that connects content creators with students. The platform enables creators to publish educational content while allowing learners to directly support and engage with their favorite educators, fostering a collaborative learning ecosystem.

Ashewa January 2024 - March 2024

<https://ashewa.com/>

Contributed to the development of **Ashewa**, one of Ethiopia's leading e-commerce platforms. Worked on improving the digital shopping experience by building user-facing features, optimizing platform performance, and supporting scalable backend services for product management and order processing.

Education

Addis Ababa Science and Technology University -

Bachelor's degree in Software Engineering | 3.67
